What is Microbiome?

Our body is made up of **50% microbial cells and 50% human cells**
This relationship is microbiome

Microbiome is a **gift from your mother** at birth

Everyday we are **damaging our microbiome** by using general chemical based cosmetics

When microbiome is damaged, it can cause many **troubles such as dandruff and hair loss**

Founder learned microbiome science when he was studying at U.K., His interest in cosmetics and microbiome science **together became Bota nouveau**

Microbiome infographics

Microbiome meets nature

With microbiome science researchers, we made products for hair, scalp, skin troubles

The 14 natural ingredients were selected to ferment for 3 years (26280 hours) to make pre/probiotics extracts
